L.I.N.C.S. Program

Learning through
Internships and
Networking with
Community
Stakeholders

Students are introduced to career fields through facility tours, career speakers, college visits, and networking events. Additional program supports include sessions on preparing for an interview, completing job applications, and employment skills.

Career sessions include

- Engineering
- Marketing/Sales
- Finance
- Manufacturing

Hands-on Skills

Students receive real world experience and employment skills through job shadowing and internship placements in various businesses in the community.

Placements are

designed to ignite the spark in individuals to find a meaningful career, provide exposure in and out of the classroom in order to focus on career exploration, and assist the student in understanding where their passion exists.

Job shadowing and internships are established in connection with the student's Career Technical Education (CTE) Pathway and career interest. Placements are individually designed based on class schedule, community stakeholder availability, and distance to placement.

Goal of LINCS Program

Academic preparation which surpasses the expectations within career and college settings. Business and industry partnerships engaging students in skills necessary to thrive in the work environment.

Together, LCHS will provide opportunities that inform students about opportunities in business, inspire students to do great things, and ignite students through expert witness.
